

BUY IT RIGHT

ALWAYS MAKE THE RIGHT CHOICE

About Us

Buy It Right™ is an inventory management system developed for retail pharmacy by a team of pharmacists. We have made a complex solution simple by creating a system that helps address the intricacies of inventory management.

Save time. Save money.

\$12,000

Saved on bulk deals alone.

On average stores save approx. \$1,000 a month on bulk deals alone. Why pay more when you don't have to?

20 hours

Avg saved on managing inventory a week.

Give staff back time so they can focus on what matters; your business and patients.

Multi-store

Enable multi-store management now.

View, manage and control inventory and stock for all your stores in one spot.

What our customers think about us..

Buy It Right makes our everyday inventory management and stock control simple, efficient and reliable. It saves us time, people power and is cost effective. It frees up our workflow so staff can be utilised in pharmacy services that benefit our communities.

Trust in Buy It Right, it gets the job done!!!!

**Montana Grenfell – Prime Pharmacy Group
Operations Manager**

Buy It Right was developed by pharmacists for pharmacists, so the system understands all the idiosyncrasies of purchasing stock for the front of shop and dispensary. It has proven to be a very efficient program for both ordering and monitoring stock and has hence saved us considerable time and consequently wages at all stores. It allows us to keep our stock levels very tight whilst taking advantage of all the bulk deals including range deals. The reports available from the program allow management to easily monitor all required stock control such as dead stock, margin, pricing etc.

Sue Fosbery – Pharmacy Owner

What We Do and How We Do It

Inventory Management

Leaving inventory management to guesswork is inefficient and costly.

Why? Improved stock management reduces inventory costs and the time spent on creating, placing and receipting orders.

How: Buy It Right uses your data to help make informed inventory decisions. It is a proven solution for independent, group and multi-channel store owners.

Advanced Forecasting

Increased stock-turns and improved working capital is achieved through accurate forecasting.

Why? Effective forecasting can mean the difference between profitability and dead stock.

How: Buy It Right analyses sales data to calculate a forecast on every SKU. Buy It Right generates pre-scheduled orders, with optimised order quantities based on forecasting, improving productivity.

Inventory Reporting

Faster decision making is easy with inventory reporting all in one place.

Why? Reporting allows you to make more informed decisions and be in control of your profit margins and stock on hand.

How: Buy It Right offers built-in comprehensive Business Intelligence reporting. Real time data collection allowing for fast and accurate reports.

Buy Better

Why pay more? Save time and money with automated orders accessing your deals.

Why? Maximise buying discounts. Minimise out of stocks ensuring you have enough for customer demand.

How: The core benefits of Buy It Right stem from sophisticated algorithms that take into consideration both the stock weight and the cost-effectiveness of the order.

What We Do and How We Do It

- Automated ordering
- Integrated solution
- Fit for multi-store or single store
- Inter-store transfers
- Compliance management
- Easy to use interface with ongoing training and support
- Compatible with all major wholesalers
- Integrated with email and/or electronic order transmission
